1. How to Install PC Software Application

1.1 Installing the USB driver

You can also download the USB driver from our official website: www.globalsat.com.tw

For GH-625:

The USB driver is required to recognize your device via USB when it is connected to your PC.

1. Insert the CD into the CD-ROM drive, and the Auto-run will begin.
2. Select the appropriated driver base on your system to install driver to your PC.
3. Follow the on-screen instructions to complete the installation.

To check Computer Management > Device Manager, you may see the Virtual COM port has been detected while the device was plugged in.

For GB-580:

The USB driver is required to recognize your device via USB when it is connected to your PC.

1. Insert the CD into the CD-ROM drive, and the Auto-run will begin.
 2. Click on the "USB Driver" to install driver to your PC.
 3. Follow the on-screen instructions to complete the installation.
- Step 1 : Use auto-run to install the USB driver or select the installation file from the CD-ROM

- Step 2: Connect the device to your PC and follow the instructions below circled in red.

“Please, connect your device, the “Found New Hardware Wizard” window will pop up; cancel it to ignore automatic hardware installation.”

- Step 3: The USB driver installation has been accomplished.

To check Computer Management > Device Manager, you may see the STM Virtual COM port has been detected.

1.2 Installing the Training Gym Pro

- Install Framework v2.0 or above

To check the Microsoft Framework version in your system go to: "Control Panel > Add/Remove Programs"

Note: Originally, the Framework version in Windows XP SP2, SP3 and Vista or above should be version 2.0.

- Installing the GS-Sport Training Gym Pro

Use auto-run to install GS-Sport Training Gym Pro or select the installation file from the CD-ROM.

- Step 1: Click Setup.exe to install the Training Gym Pro.

Setup_Training Gym Pro
GH-Sport PC Software
Globalsat company

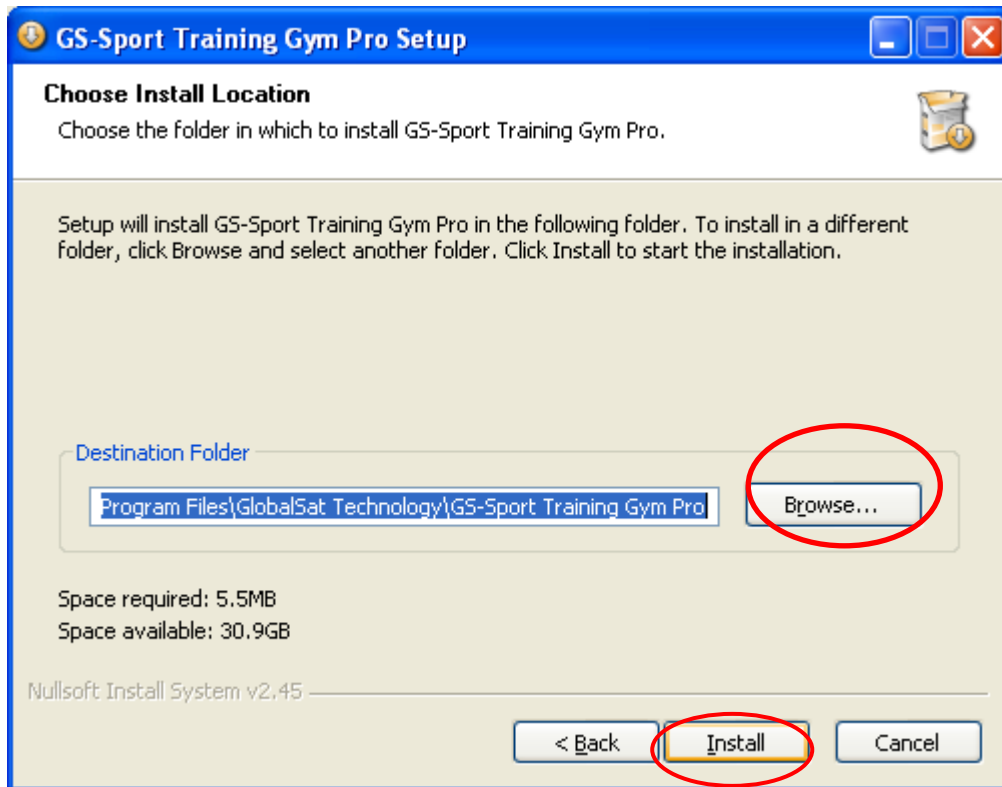

- Step 2 : Choose language

- Step 3 : Press "OK"

- Step 4 : Press "Install"

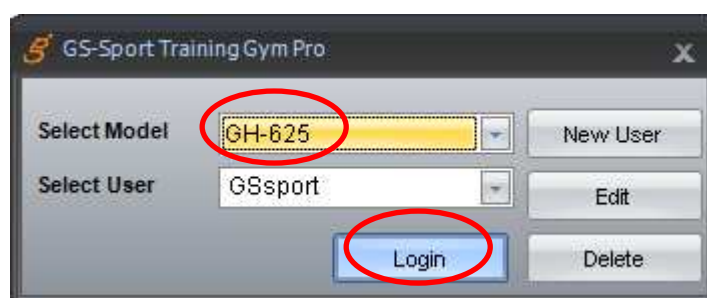

- Step 5: Installation process and press “close” to enter the Training Gym Pro application.

- Step 6 The software will execute and connect the database automatically.

- Step 7: Create a user account and select model.

Note: Please base on your device type to select Model before use.

- Step 8 : The process bar will detect connection via the USB cable.(please connect USB cable and device before open the software for application detecting the com port)

2. Running GS-Sport Training Gym Pro Application

You can run the GS-Sport Training Gym Pro by double clicking on the " GS-Sport Training Gym Pro " short-cut icon from desktop. Or go to **Start > All Programs > GlobalSat GS-Sport > GS-Sport Training Gym Pro**.

3. PC Software Application Introduction

3.1 System Requirement

For better performance, the following system requirements are recommended for GS-Sport Training Gym Pro:

- CPU: Pentium III Processor or higher.

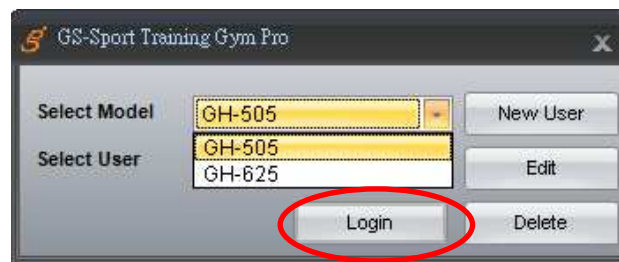

- At least 512 MB of RAM
- Windows XP, Vista or higher.
- Internet Explorer 6.0 or higher
- Framework 2.0 or higher

3.2 How to Create/Login Software

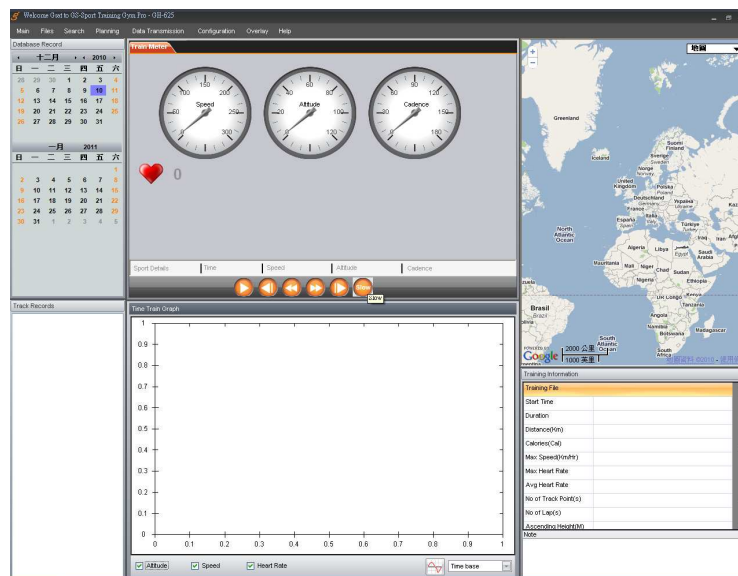

- You should have been prompted to create a user name when you installed the software

- Login

- GS-Sport Training Gym Pro software

Note:

1. You can create other user names to login and import backup database as well.
2. Please be sure that you are connected to the Internet before the software is opened

4. PC Software Application

4.1 Main Menu

4.1-1 Import Activity

In GS-Sport Training Gym Pro, click *[Main] > [Import Activity]*

You can import any serial of GSSport Training Gym to Training Gym Pro software

- Select the .act file of training data and then click "Open"

- Will pop a message when activity information be loaded successfully.

- The listed of loaded activity information showed on left bottom of column

- Will pop a message to let you know the file name and file be saved.

4.1-3 Capture Google Map

Capture current Google map window and save it as JPG format

4.1-4 Show on Google Map

Show the trained information on Google map directly.

4.1-5 Show on Google Earth

Show the training data on Google earth directly (please download google earth in advance)

4.1-6 Log Out

You can log application out and change other username to login.

4.1-7 Exit

When you click the exit, system will exit the software.

4.2 File Menu

4.2-1 Open

Choose the several kind of log file you want to load into Training Gym Pro software besides, it supports KML, GPX, CSV, NMEA, TXT format.

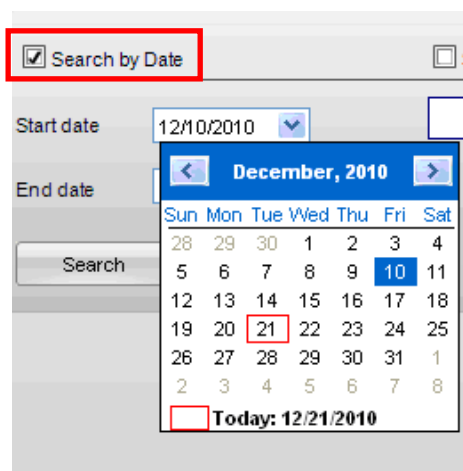

4.2-2 Save

Choose the file from data base you want to save it. Right now it supports KML, GPX, CSV, NMEA, TXT format.

4.3 Search Menu

4.3-1 Search by date

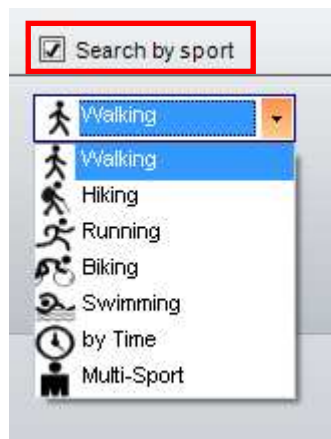

Check "search by date " and select the period of date to get completely training information.

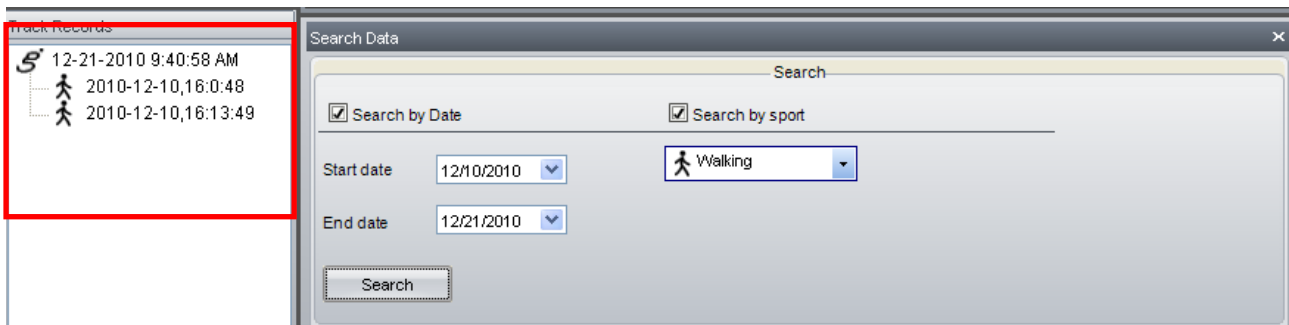

4.3-2 Search by sport type

You can seek the sport you interest by search by sport types

- Check "Search by date" or 'Search by sport" to find the training data. Or select both at the same time to find accuracy data

- The completely training information will still show on the left bottom of column..

4.4 Planning Menu

4.4-1 Way Points

You can plan your waypoints or finding somewhere through Way Points.

- Please enter an address or a name then press search (optional).

- Press Add Waypoint and add a waypoint on Google map.

- Add the waypoint on Google map then name it (limitation 6 characters) and save it. And the map will show every waypoint you just added.

- When waypoint saving is finished, you will see all waypoints on top column. Then, you can select waypoints you need and go to [Data Transmission] > [Way Points] > [Upload to Device] to upload waypoints to your device. (Please see 4.5-2 Way Points for details.)

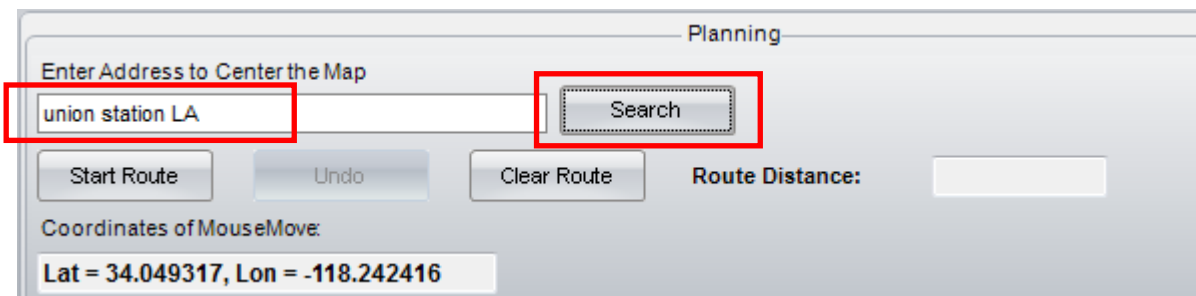

Train Meter		Way Points					
	Serial No.	Location name	Icon Index	Altitude	Latitude	Longitude	Remarks
<input type="checkbox"/>	1	p1	0	45.93	24.996346	121.487997	
<input checked="" type="checkbox"/>	2	UniSta	0	282	34.058064	-118.237052	

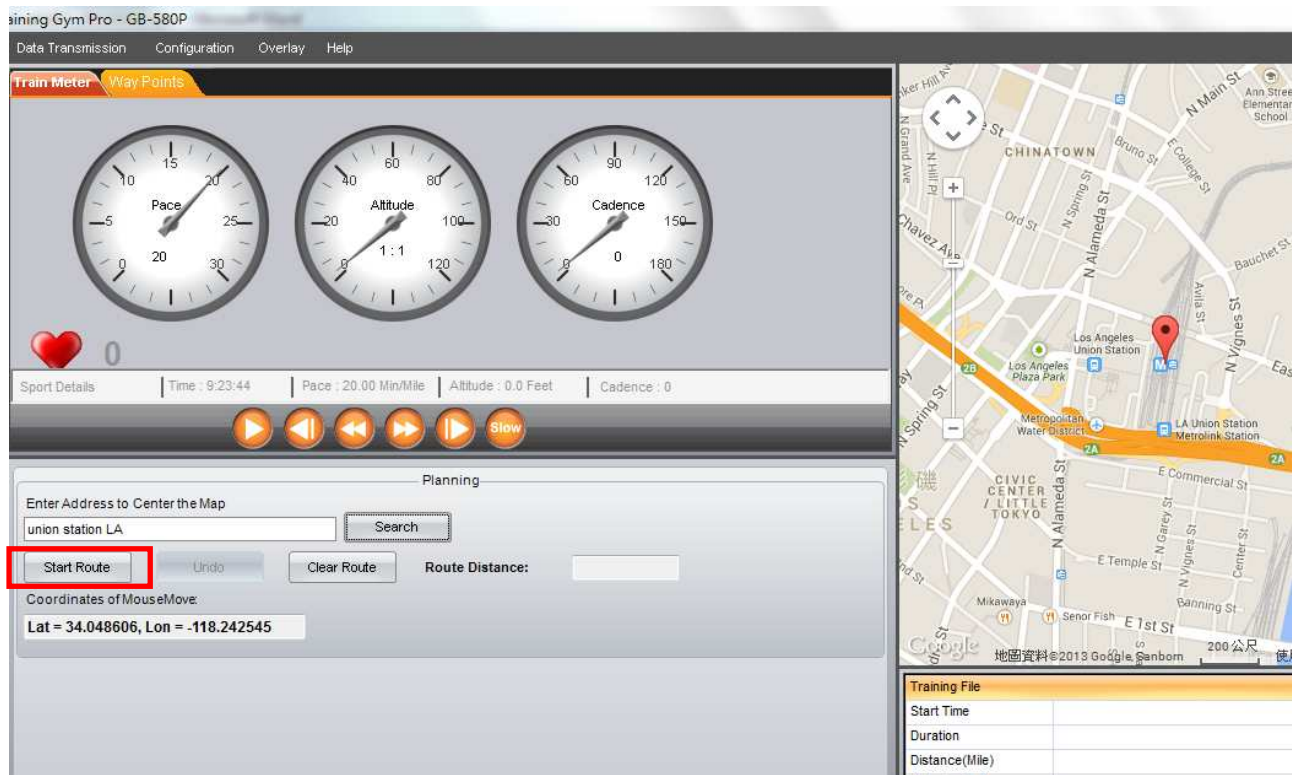

4.4-2 Routes

You can plan your routes and upload to your device through Routes.

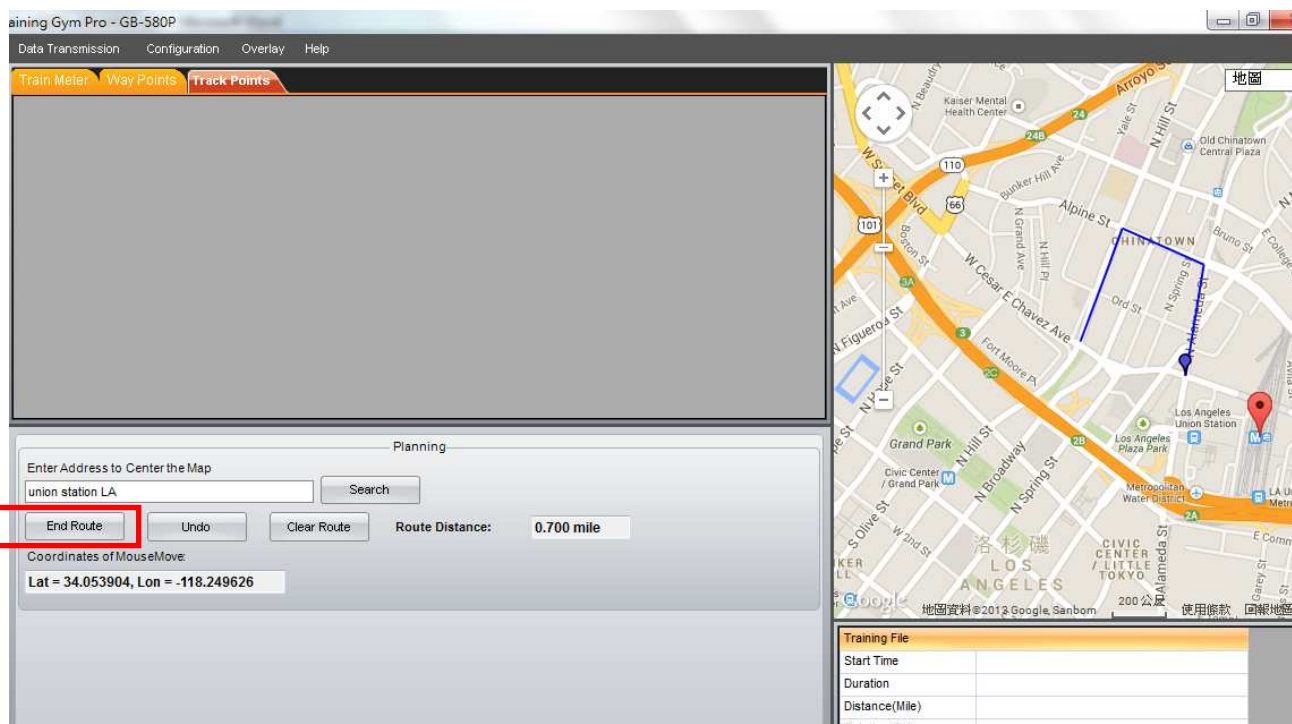

- Please enter an address or a name then press search (optional).

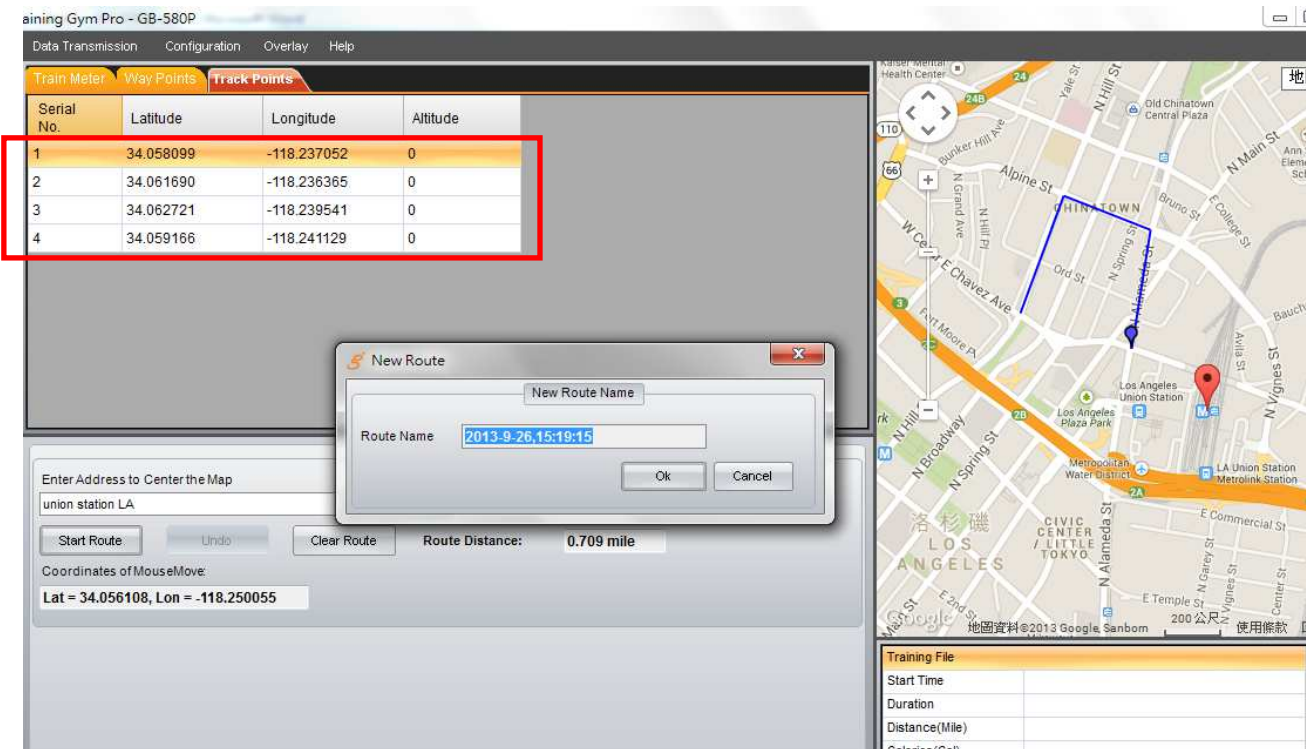

- Press Start Route and add the first waypoint on Google map.

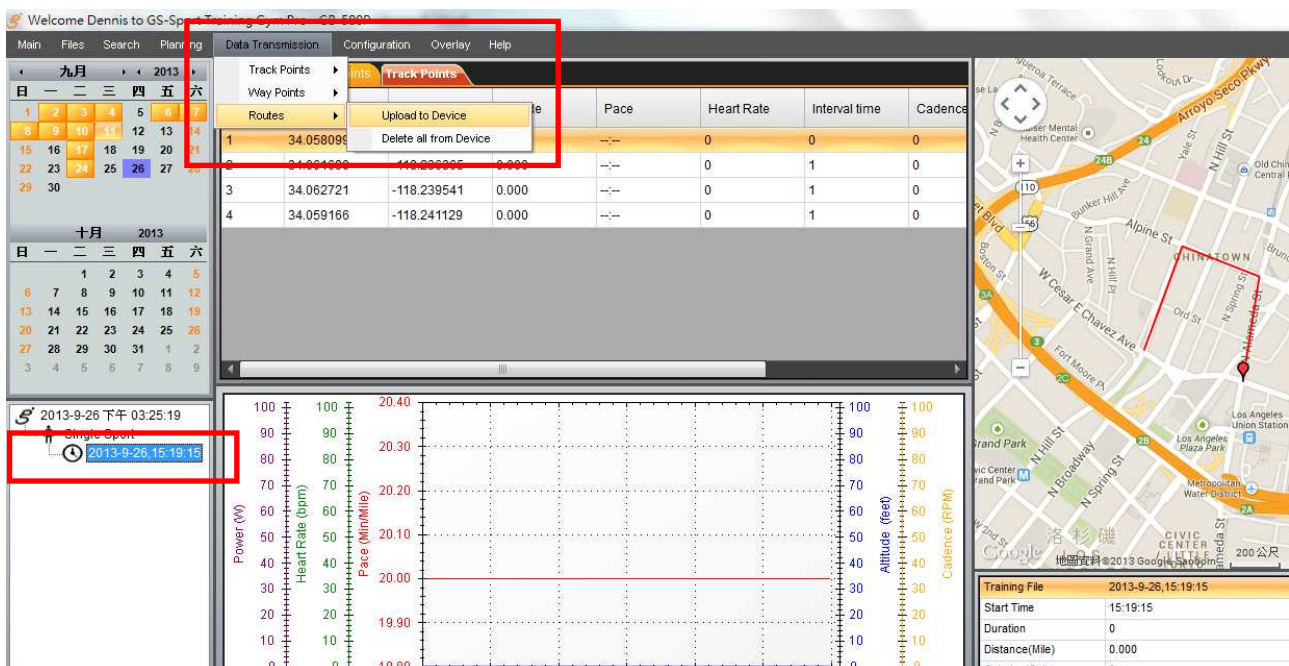

- Keep adding waypoints on Google map for the route. When you finish routing, please press End Route.

- Name the route and save it. And your waypoints information will be shown on top column.

- When route saving is finished, you will see the route on left bottom of column. Then, you can go to [Data Transmission] > [Routes] > [Upload to Device] to upload the route to your device. (Please see 4.5-3 Routes for details.)

4.5 Data Transmission Menu

4.5-1 Track Point

4.5-1.1 Download from device

- When you click [Data Transmission] > [Track Point] > [Download from device], the system will search device and the progress bar shows as below

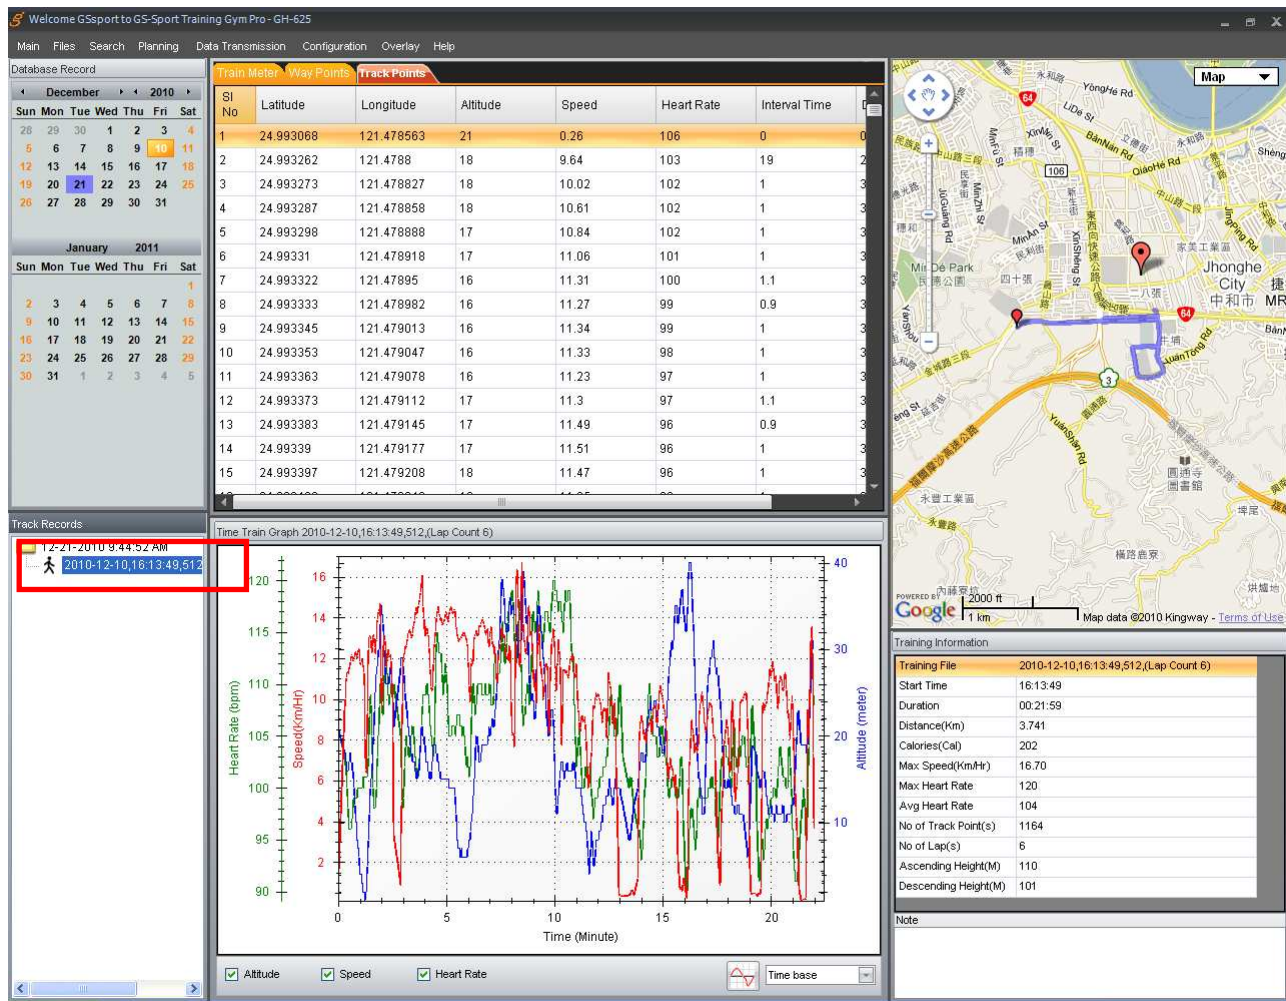

- List of training data will show and you can select which training data to download.

- Download training data progressing bar

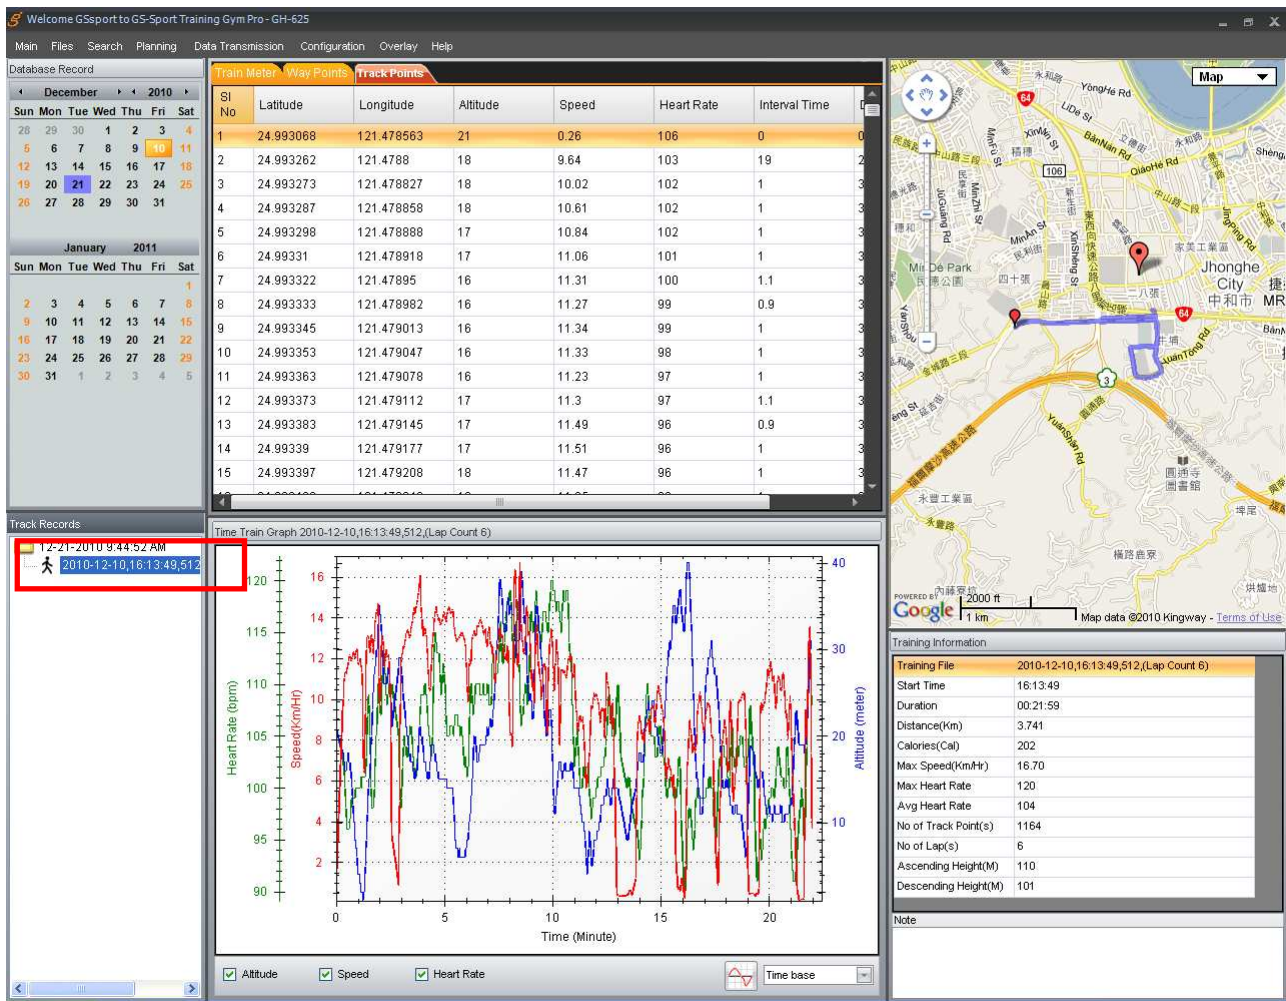

- Training data and statistics will show on left column after downloaded from device

4.5-1.2 Upload to device

- You can click [Data Transmission] > [Track Point] > [Upload to device] and select the training data on left bottom of column to transfer to device.

4.5-1.3 Delete all from device

- When you click [Data Transmission] > [Track Points] > [Delete all from device] will pop a message to double confirm as are you sure you want to delete all Track Record from device. Click "Yes"

- Start to delete all training data from device

- All Track Records deleted successfully from the device.

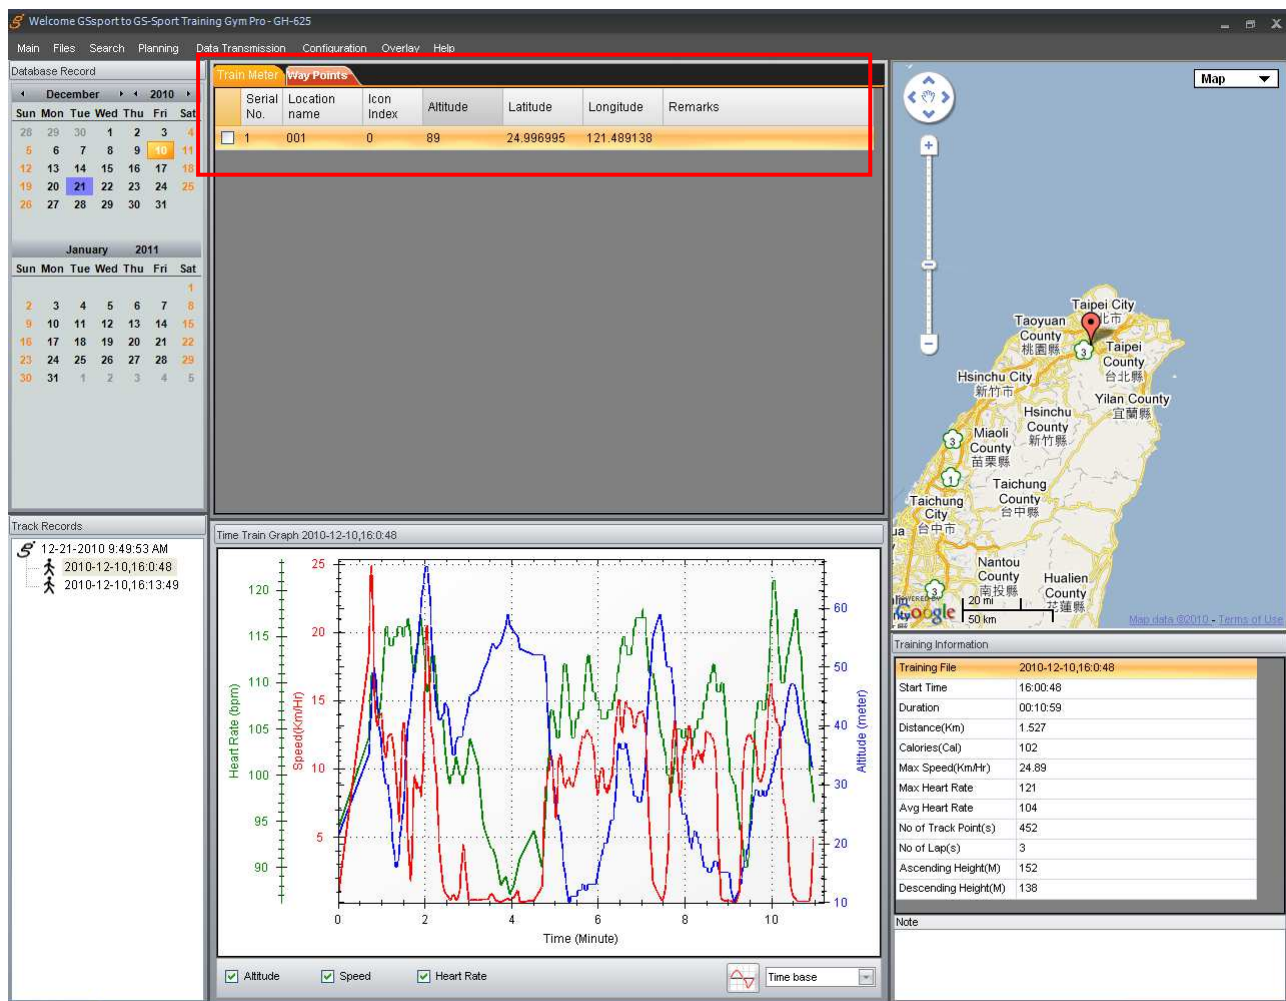

4.5-2 Way points

4.5-2.1 Download from device

- You can click [Data Transmission] > [Waypoint] > [Download from device], to download waypoints from device to PC Software.
- All list of waypoint will transmit directly and show on the top column.

4.5-2.2 Upload to device

- You can click [Data Transmission] > [Waypoint] > [Upload to Device] to transfer waypoints from PC Software to device.
- Select the waypoint you want to transmit to device.

- Uploading waypoint completed successfully when finished.

4.5-2.3 Delete all from device

- You can click [Data Transmission] > [Waypoint] > [Delete all from device] to delete the all waypoints of device.

4.5-3 Routes

4.5-3.1 Upload to device

- You can click [Data Transmission] > [Routes] > [Upload to device] and select the training data on left bottom of column to transfer to device.

4.5-3.2 Delete all from device

- When you click [Data Transmission] > [Routes] > [Delete all from device] will pop a message to double confirm as are you sure you want to delete all Route Records from device. Click "Yes"

- All Routes deleted successfully from the device.

4.6 Configuration Menu

4.6-1 Com Port Setting

You can scan COM port to build synchronization between device and computer.

- Please scan the comport before your start uploading or download data to device

- Comport scan finished

4.6-2 Device Configuration

- The application will retrieve device information and all configurations. And you also can configure them. You can save the configuration as a log file or direct to configure device.

4.6-3 Firmware Upgrade

You can update your firmware of device by using this item.

- Click "Browse" to select the latest firmware file (*.ghx) to upgrade.

- To select the firmware version and open it

- Press Update to get new firmware

- Are you sure you want to update device, you will lose all device data , Press OK
(If you need to save old data in device, please save it before you update new firmware.)

4.6-4 Unit Exchange

- You can change the expression between Speed(Dist/Hr) and Pace(Min/Dist).
- There are three measurement units for selection. (Metric, Mile system, Nautical)

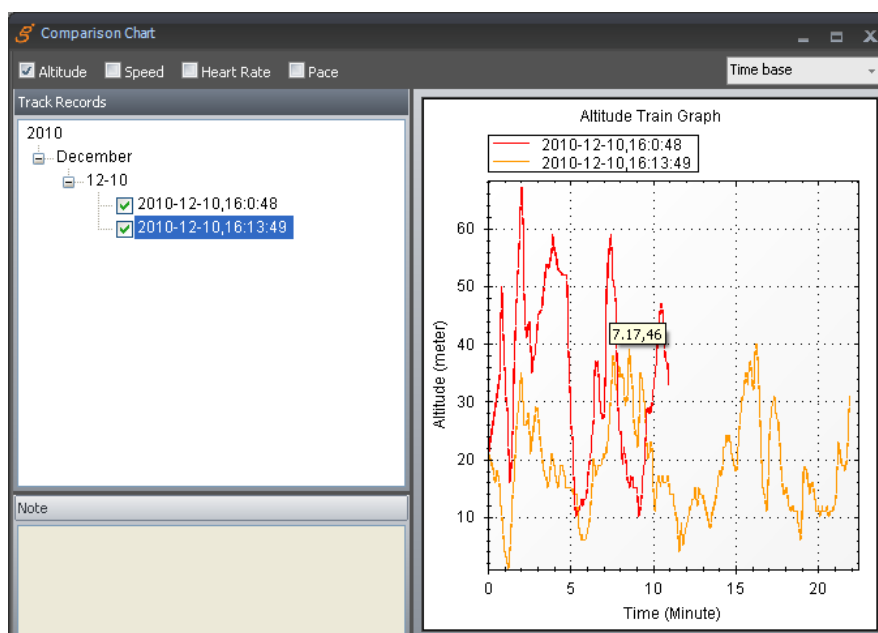

4.6-5 Language

There are English, Chinese, Spanish, German, Italian, French, Japanese and Russian languages for selection. Once you chose a language, the Training Gym Pro will change accordingly.

4.7 Overlay

To get comparison with multiple records, you can use Overlay to get start.

Click Overlay to active the control window and select data folder you interest to make comparison. And you can make a comparison in Time base or Distance base.

4.8 Help Menu

4.8-1 About GS-Sport

You will see the version of Training Gym Pro.

4.8-2 About Us

Will connect to GS-Sport website directly: www.gs-sport.com.tw

5. Map types

There are two main popular webpage instant Map available in Training Gym Pro software. Google map and Open Street Map which includes Cycle map, Mapnik map, Osmarender Map:

5.1 Google Map (Google Map)

5.2 Satellite Map (Google Map)

5.3 Terrain Map (Google Map)

5.4 Hybrid Map (Google Map)

5.5 Cycle Map (Open Street Map)

5.6 Mapnik Map (Open Street Map)

5.7 Osmarender Map (Open Street Map)

6. Troubleshooting & FAQ

1. Why does it show “PC com port error” when I download data?

Solution:

- (1). Please check if the USB driver is installed or not.
- (2). Please check the USB driver supports your system or not.
- (3). Connect to your PC with the USB cable.
- (4). Double click the “GS-Sport Training GYM Pro” icon from desktop to start the application.
- (5). From menu bar click “Configurations”, and click “Scan COM Port” button.
COM port will be automatically scanned.

2. How do I backup the data base from Training Gym Pro?

Solution:

Right Now Training Gym Pro uses XML data base system. It is easy to get the data base. You can find it in :

C:\Program Files\GlobalSat Technology\GS-Sport Training Gym Pro\Data

And copy the folders and then uninstall the Training Gym Pro.
